EXTERNAL DEPENDENCIES AND API DECLARATION

Academic Project Compliance Record

In accordance with academic project guidelines, all software dependencies, libraries, and external API interfaces utilized in the project developed by **Mrinmayee Pramod Kulkarni (PRN: 124B2B025)** for **"Secure Code Review Assistant: AI-Powered Debugging and Vulnerability Detection"** are formally declared below:

Component / Service	Provider / SDK	Version / Model	Internet Required?
AI Model API	Google Cloud / DeepMind	Google Gemini 1.5 Flash	Yes (API call)
SDK Integration	Google Gen AI SDK	google-genai / google-generativeai	Yes
Local Analysis Fallback	Secure Code Rule Engine	OWASP Rule-Based Parser	**No (100% Offline)**
Web UI Framework	Streamlit Open-Source	v1.30.0+	**No (Localhost)**
Environment Loader	python-dotenv	v1.0.0+	**No (Local file)**

Candidate Confirmation: The application logic, user interface, analysis workflows, error handling, and offline security rule fallback were implemented by me. External dependencies are restricted to runtime libraries and API connectivity.
